Department of Information Technology
Gauhati University

Curriculum for-

1. **B.Tech. (IT/CSE) Honours in Artificial Intelligence and Machine Learning**

Artificial Intelligence and Machine Learning, and Data Science are emerging fields of studies, and are important both from the Students point of view as well as requirements for the Industry and Professions. These disciplines have crossed the boundaries of traditional Information Technology and Computer Science, and becoming Tools and Technologies for across the disciplines. This has created a new demand of specialized training producing empowered human resources with emphasis on the contemporary tools, techniques and applications of AI ML and DS, leaving behind many traditional components of IT/CSE.

While the department shall continue to foster with Core IT/CSE in the B.Tech. curriculum, simultaneously shall facilitate interested local students to be specific in their learning directions with AIML and DS. And for this, these two Honours Programmes are designed and developed.
